

A scatter plot showing the relationship between $\log_{10}(\text{FC})$ on the x-axis and $\log_{10}(\text{FC})$ on the y-axis. The data points are represented by open circles, and a solid black line represents the linear regression. The coefficient of determination is $R^2 = 0.02$, indicating a very weak correlation. The y-axis has major tick marks at 0, 1000, 2000, and 3000. The x-axis has major tick marks at 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10.

R² = 0.02
